Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use the 700MHz spectrum auction to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Bob Litwins  
2413 Camden Court  
Plano, TX 75075

Commissioner Jonathan Adelstein

Dear Commissioner Adelstein,

The upcoming auction of the 700MHz spectrum is one of the most significant in history. The FCC should institute rules for this auction that ensure the principle of network neutrality - freedom of speech on our communication networks - applies to our mobile and wireless networks as well as to the internet.

A truly open standard would allow the following:

- \* Open applications: consumers should be able to download and utilize any software applications, content, or services they desire;
- \* Open devices: consumers should be able to utilize their handheld communications device with whatever wireless network they prefer;
- \* Open services: third parties (resellers) should be able to acquire wireless services from a 700 MHz licensee on a wholesale basis, based on reasonably nondiscriminatory commercial terms; and
- \* Open networks: third parties (like Internet service providers) should be able to interconnect at any technically feasible point in a 700 MHz licensee's wireless network.

You have the opportunity to make history.

Don't let telecom giants like AT&T and Verizon continue to determine what content the citizens can and cannot access on mobile networks. This spectrum rightfully belongs to the public.

Set rules for the upcoming auction of the 700 MHz auction that embrace open standards and promote wireless freedom.

Sincerely,

Alexander Varghese 25D Congressional Circle Reading PA 19607

Sincerely,  
Alexander Varghese
